--- UPDATE 20.11.2018 ---
Embedded a video with all required steps.

I guess not everyone remembers that the OData protocol was initiated by Microsoft over ten years ago.

What is quite common today was a rather big thing a few years ago when Microsoft handed over OData to the [OASIS committee](#) and started the success of the protocol. In the meantime Microsoft is one of the biggest open source contributors and SAP and Microsoft are now chairs of the committee and drive the collaboration forward.

Advancing open standards for the information society
